Product Title DRIED BLOOD 20KG SACK

Product Code OC30262

The basic components are porcine blood red cells which maintain their basic properties due to specific technology used to obtain the blood.
Blood is obtained through a low-temperature collection, cooling and storage system. This procedure guarantees "clean" raw material that is free from any element or substance foreign to blood.
AProThem™ is an ingredient soluble in water which exhibits the original properties of haemoglobin once hydrated.
