

HANDEE

The 'Handee' cheese cutter cuts cheese quickly, neatly and economically with no crumbling or waste.

Made from one piece of food-grade white melamine, it is completely resistant to chemical action from cheeses.

It is hygienic, durable and safe to use, with a base size of 33cm x 28cm.

The stainless steel patented floating wire (60cm) slices smoothly through all type of cheese and returns to cutting position after each cut.
