

SHARPENING STONE

Rev. 00

1. PRODUCT:

Sharpening stone

2. DESCRIPTION:

Sharpening stone with high efficiency index, contributing to increase the durability and precision of sharpening.

Figure 1. Illustrative image of the product

3. APPLICABILITY:

Knife sharpening in general.

4. DIMENSIONS AND TOLERANCES:

Catalogue No.	Description	Dimensions	Feature
KBKS1	Sharpening stone	200 x 50 x 25 mm	Double-sided (roughing and finishing)

5. TECHNICAL CONSTRUCTION:

Abrasive material

Double granulation: side for roughing 120 and another for finishing 320

Recovers and reforms the cutting angle

6. SAFETY:

Always use Personal Protective Equipment (PPE) appropriate to the work to be performed.

7. HOW TO USE:

- When using the sharpening stone for the first time, leave it in a container with cold water for approximately 10 minutes. Then, remove it and place it on a sharpening stone holder, preventing it from moving during the sharpening process.
- During handling, always try to use some water to ensure the dampness of the sharpening stone. This procedure helps in removing the filings and decreasing the temperature, ensuring the convenience and safety of users.
