THE POP UP® DISPOSABLE COOKING THERMOMETER, IS A TEMPERATURE INDICATING DEVICE WHICH PROVIDES A VISUAL INDICATION OF THE ATTAINMENT OF A SPECIFIED TEMPERATURE. THE DEVICE ALLOWS A STEM BIASED BY A SPRING TO BE RELEASED INTO AN EXTENDED POSITION UPON ATTAINMENT OF A SPECIFIED TEMPERATURE. THE RETAINING MEANS OF THE DEVICE, A FUSIBLE MATERIAL, HOLDS THE STEM IN A RETRACTED POSITION UNTIL THE FUSIBLE MATERIAL MELTS, AT WHICH TIME A SPRING URGES THE STEM INTO AN EXTENDED POSITION. WHEN IN THE EXTENDED POSITION, THE STEM PROVIDES A VISUAL INDICATION TO THE USER THAT THE PRODUCT HAS REACHED AN ACCEPTABLE TEMPERATURE LEVEL AND DONENESS.
