

3 models available 50, 65 & 80 knots per minute with 30mm gap between bands.

Removable Tying Head - The head can be removed in under a minute, meaning when maintenance is due, the head can simply be swapped for a replacement minimising down time.

Stainless head - no aluminium is used only stainless steel and brass meaning they can be cleaned with a power hose.

One piece design - Removing connections between the machine and conveyers, eliminating possible water ingress.

Wide Infeed - Our tunnel is effectively over 150mm wider than any other on the market, coping with the largest of pork joints.

Auto set up. Easy 7 step knotting head set up

Broken Castors, ensuring secure footing while working and easy movement when required.

Operated with compressed air and 3 phase power supply.
